

Tenancy Express

Background

Tenancy Express is a revolutionary platform that assist estate and letting agents create, agree and sign their tenancy documentation online, 24 hours a day, 365 days a year. www.TenancyExpress.com

Solution

With the help of VirtualFiles, Tenancy Express have introduced a new bespoke platform for the property industry

Tenancy Express has been developed to improve communication and paperwork efficiency in tenancy administration. This leading technology offers clients the ability to create legally binding documents online, in real time and electronically sign agreements. Tenancy Express Manager, Charles Stoten, explains: "The process of generating tenancy paperwork, posting it and awaiting its return via post used to take days if not weeks. With our new Tenancy Express offering, the process can be completed within an hour, saving our clients time, money and stress".

Benefits

The new Virtual Files system has been critical to the launch of Tenancy Express. The software is highly secure and keeps all agents up-to-date with projects at the push of a button.

VirtualFiles released the tenancy administration software for Tenancy Express only 3 months ago, which replaced outdated pre-tenancy administration procedures, and has already been hailed a huge success with clients. Tenancy Express now operates the new high tech, secure software, giving the company and its clients a real competitive edge.

Testimonial

Charles concludes: “Tenancy Express would not be what it is today without VirtualFiles. It has given the company an opportunity to offer something completely new to the marketplace.”

VirtualFiles offer a range of next generation management software platforms, providing global enterprise-wide solutions. For more information about VirtualFiles and how a bespoke platform can revolutionise your business, call 020 3011 0240 or email sales@virtualfiles.co.uk.
